

This user guide will help you set up and start with our new FD Mealplanner web and mobile app. See our instructions below.

#### **WEB-BASED PLATFORM:**

Type www.fdmealplanner.com in your computer's browser.

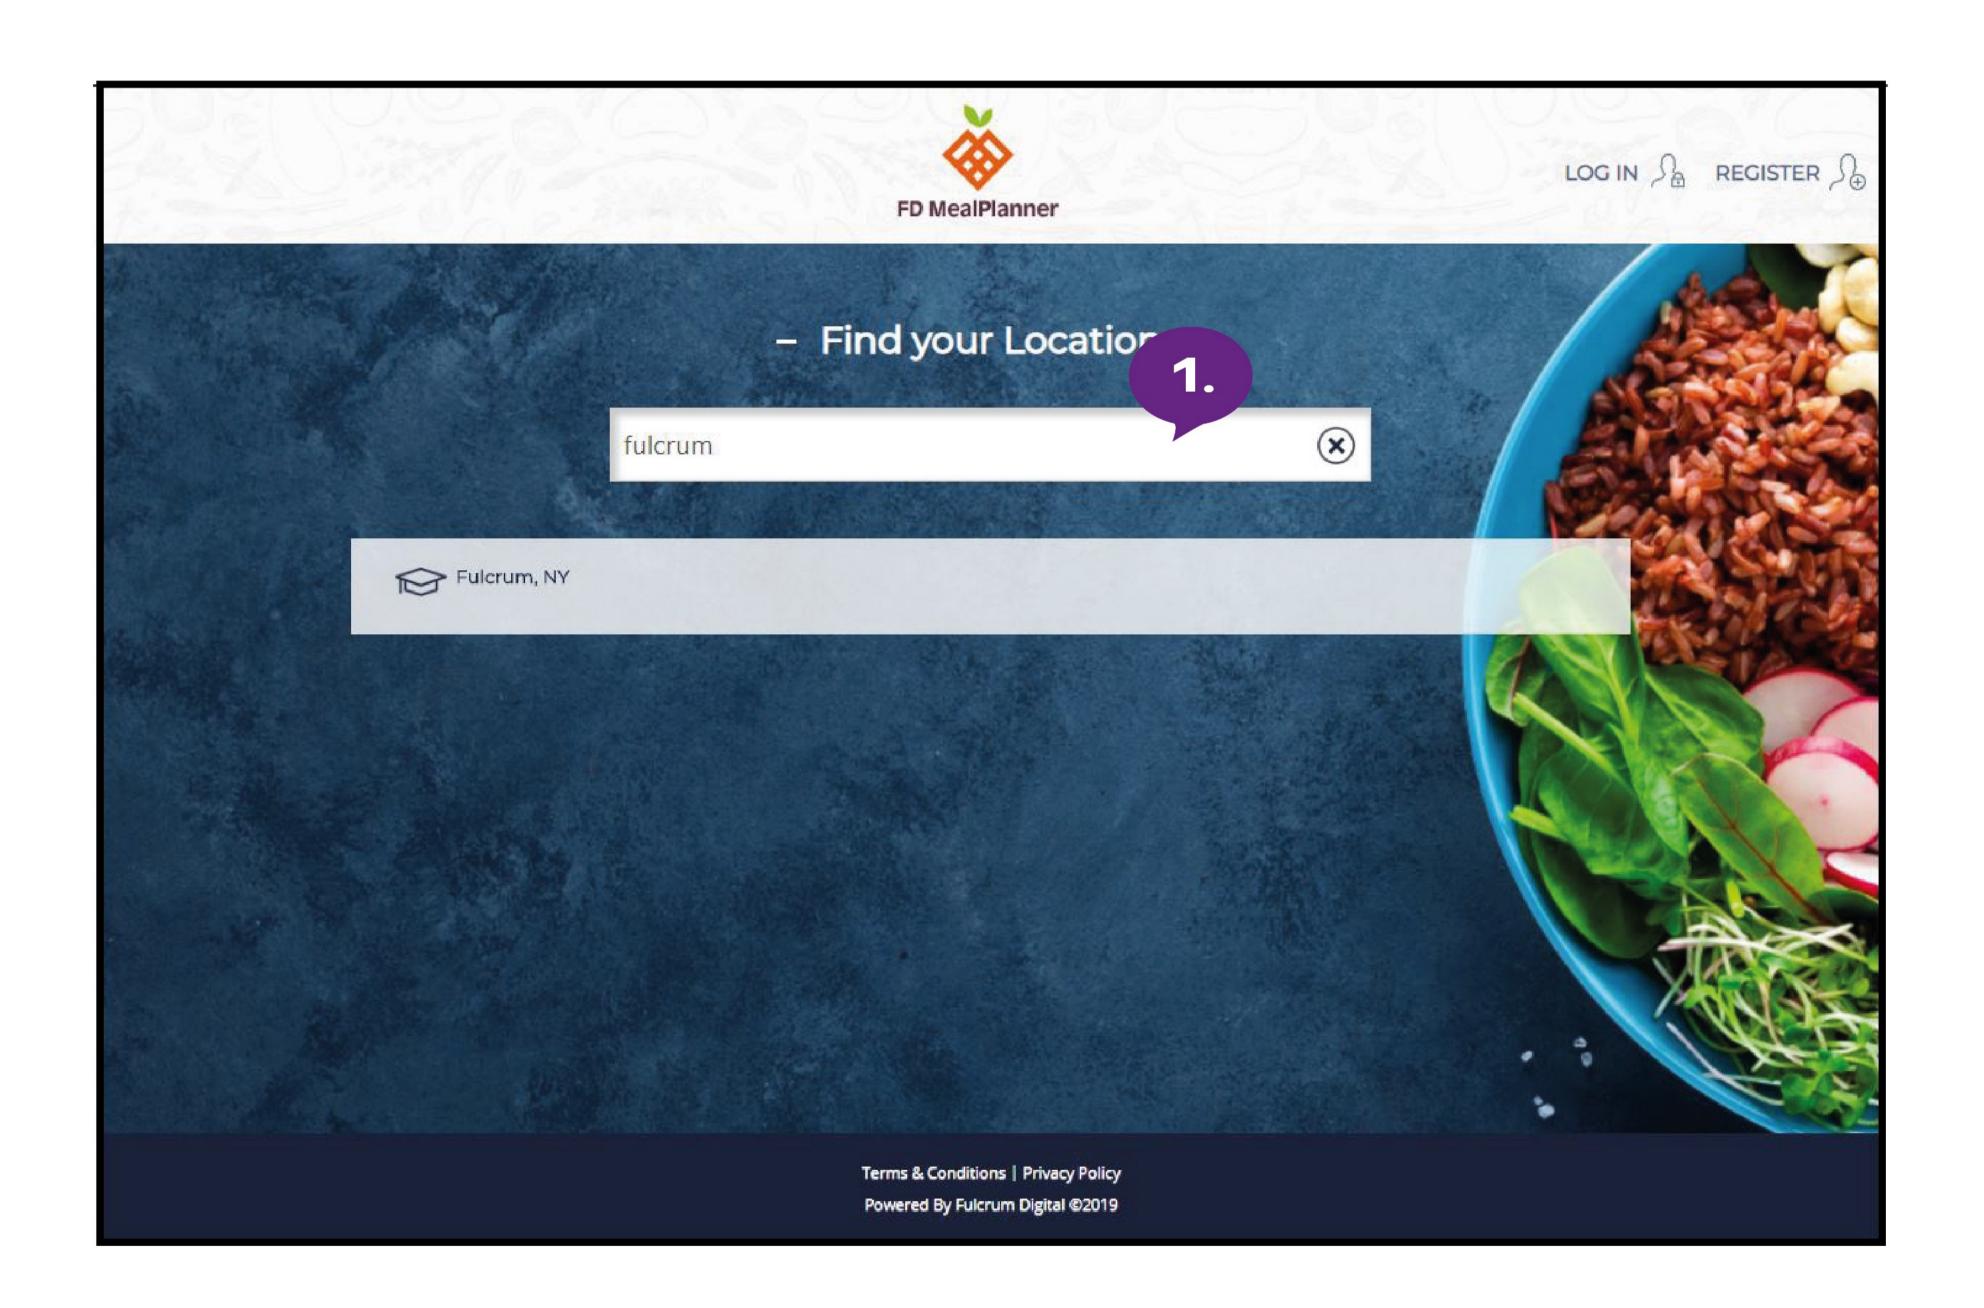

#### **MOBILE PLATFORM:**

Mobile users must download the free "FD MealPlanner" app. (IOS devices use the app store and Android devices the Google Play Store).

\*No user name or login is required for either platform to view data and menus, however if you want to save data or preferences you will need to create a username and password.

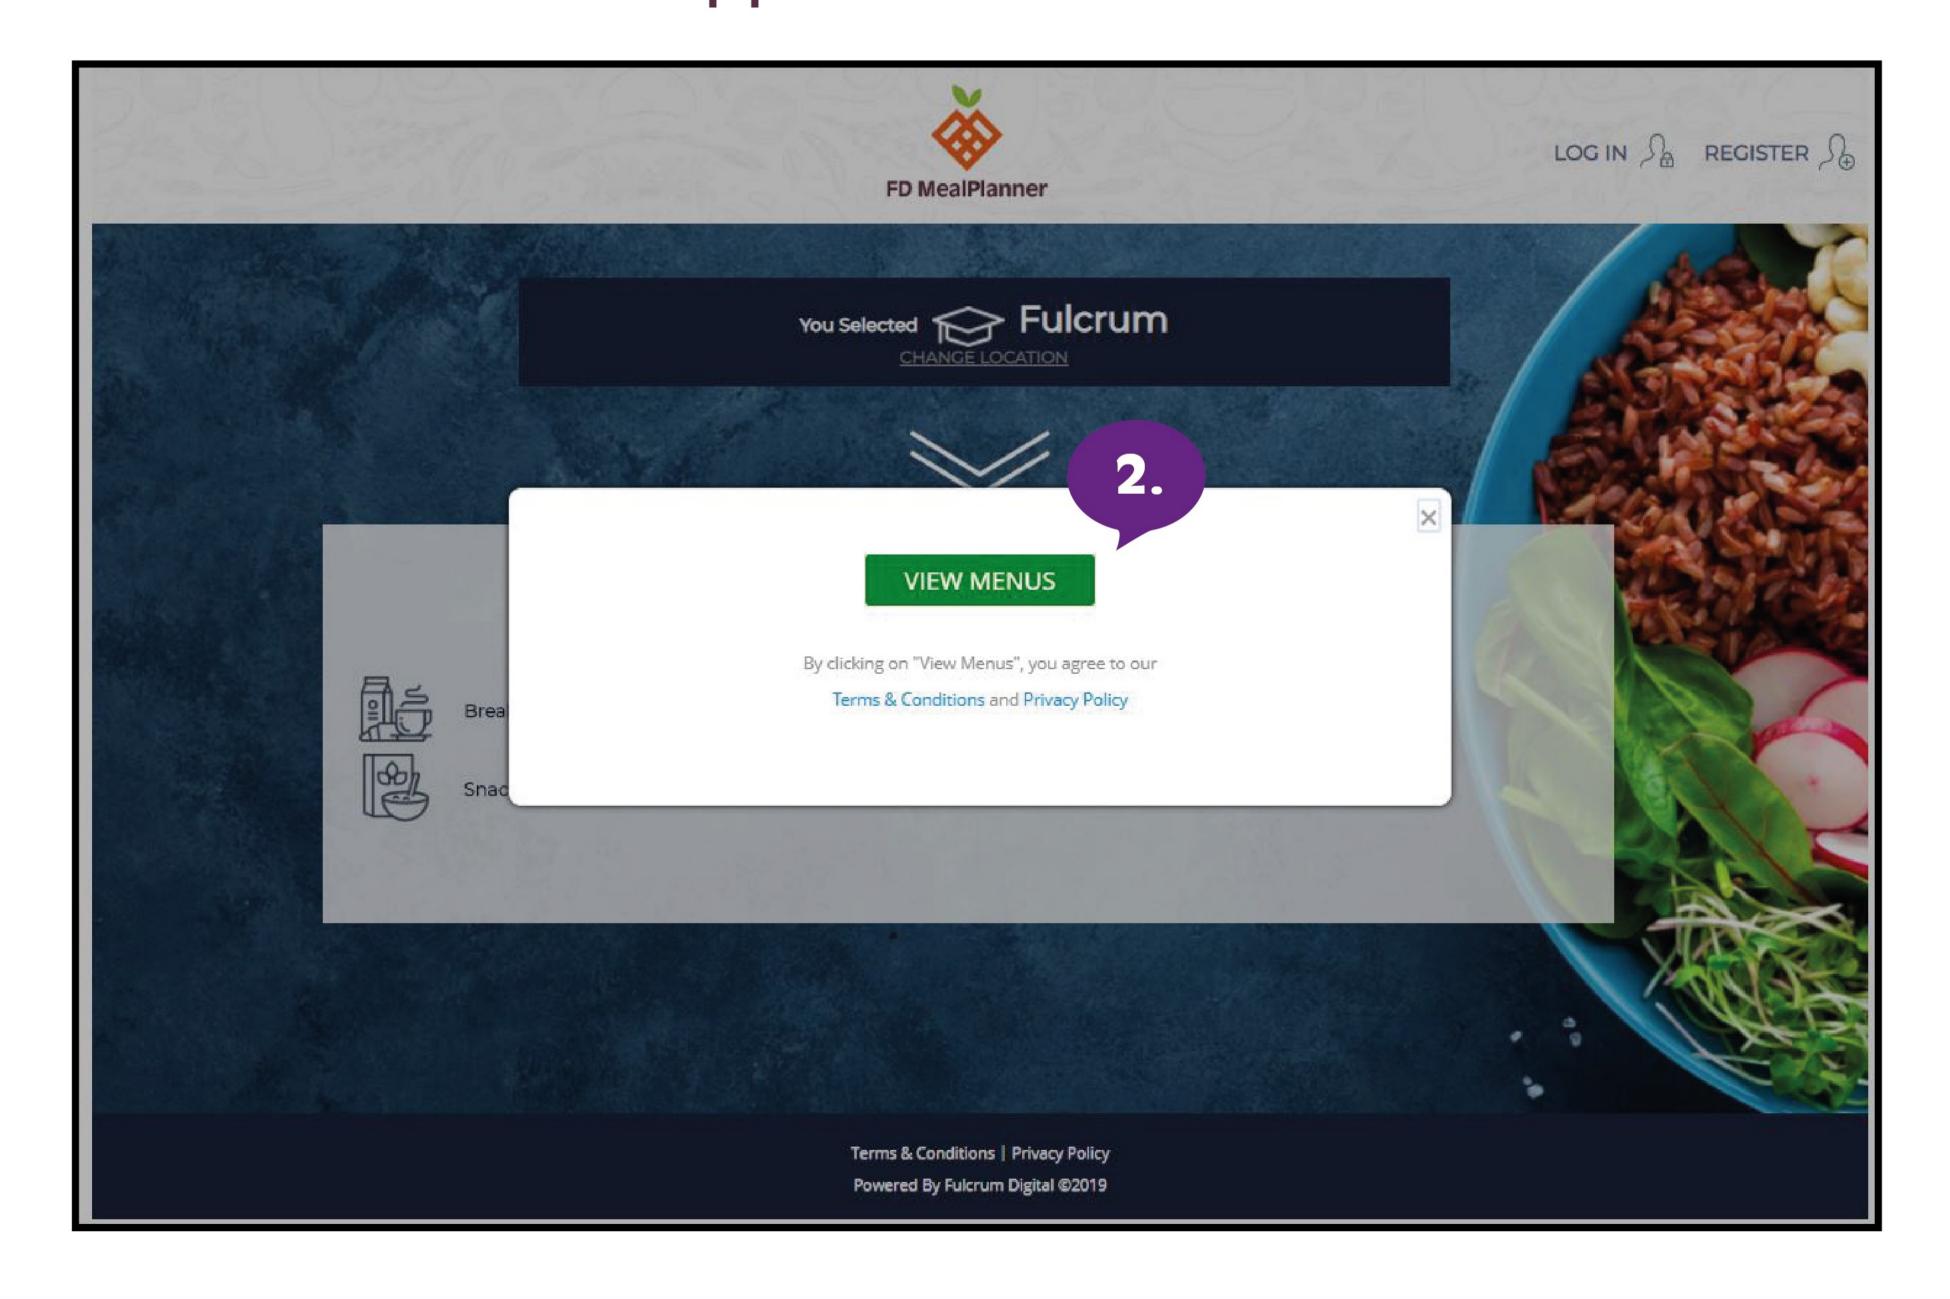

In the search bar, under FIND YOUR LOCATION type your cafeteria name and click on the search icon. All matching locations will appear.

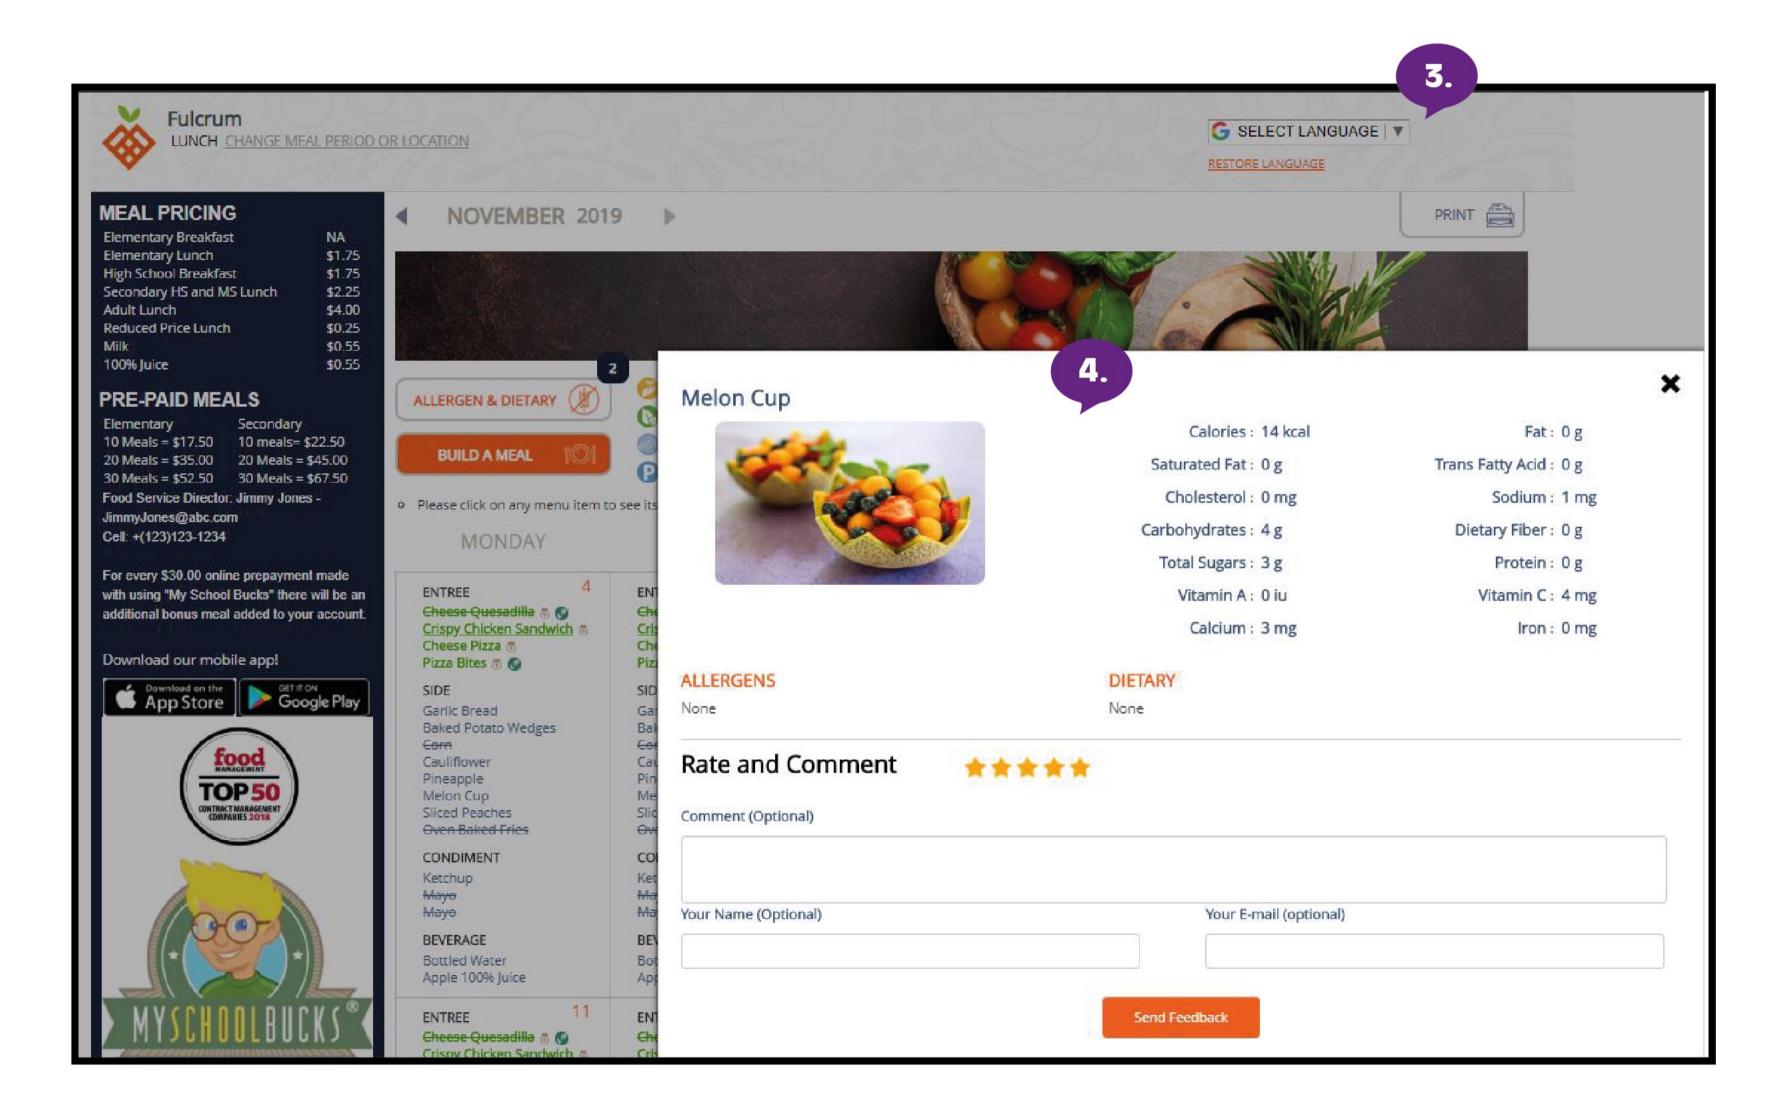

Select the appropriate location, then select the meal period (Breakfast, Lunch, Dinner or Snack). A pop-up window will appear that says VIEW MENU, which is the terms and conditions agreement for viewing menus. Click the green view menu button to proceed. The menu belonging to the cafe and the meal period selected will now appear.

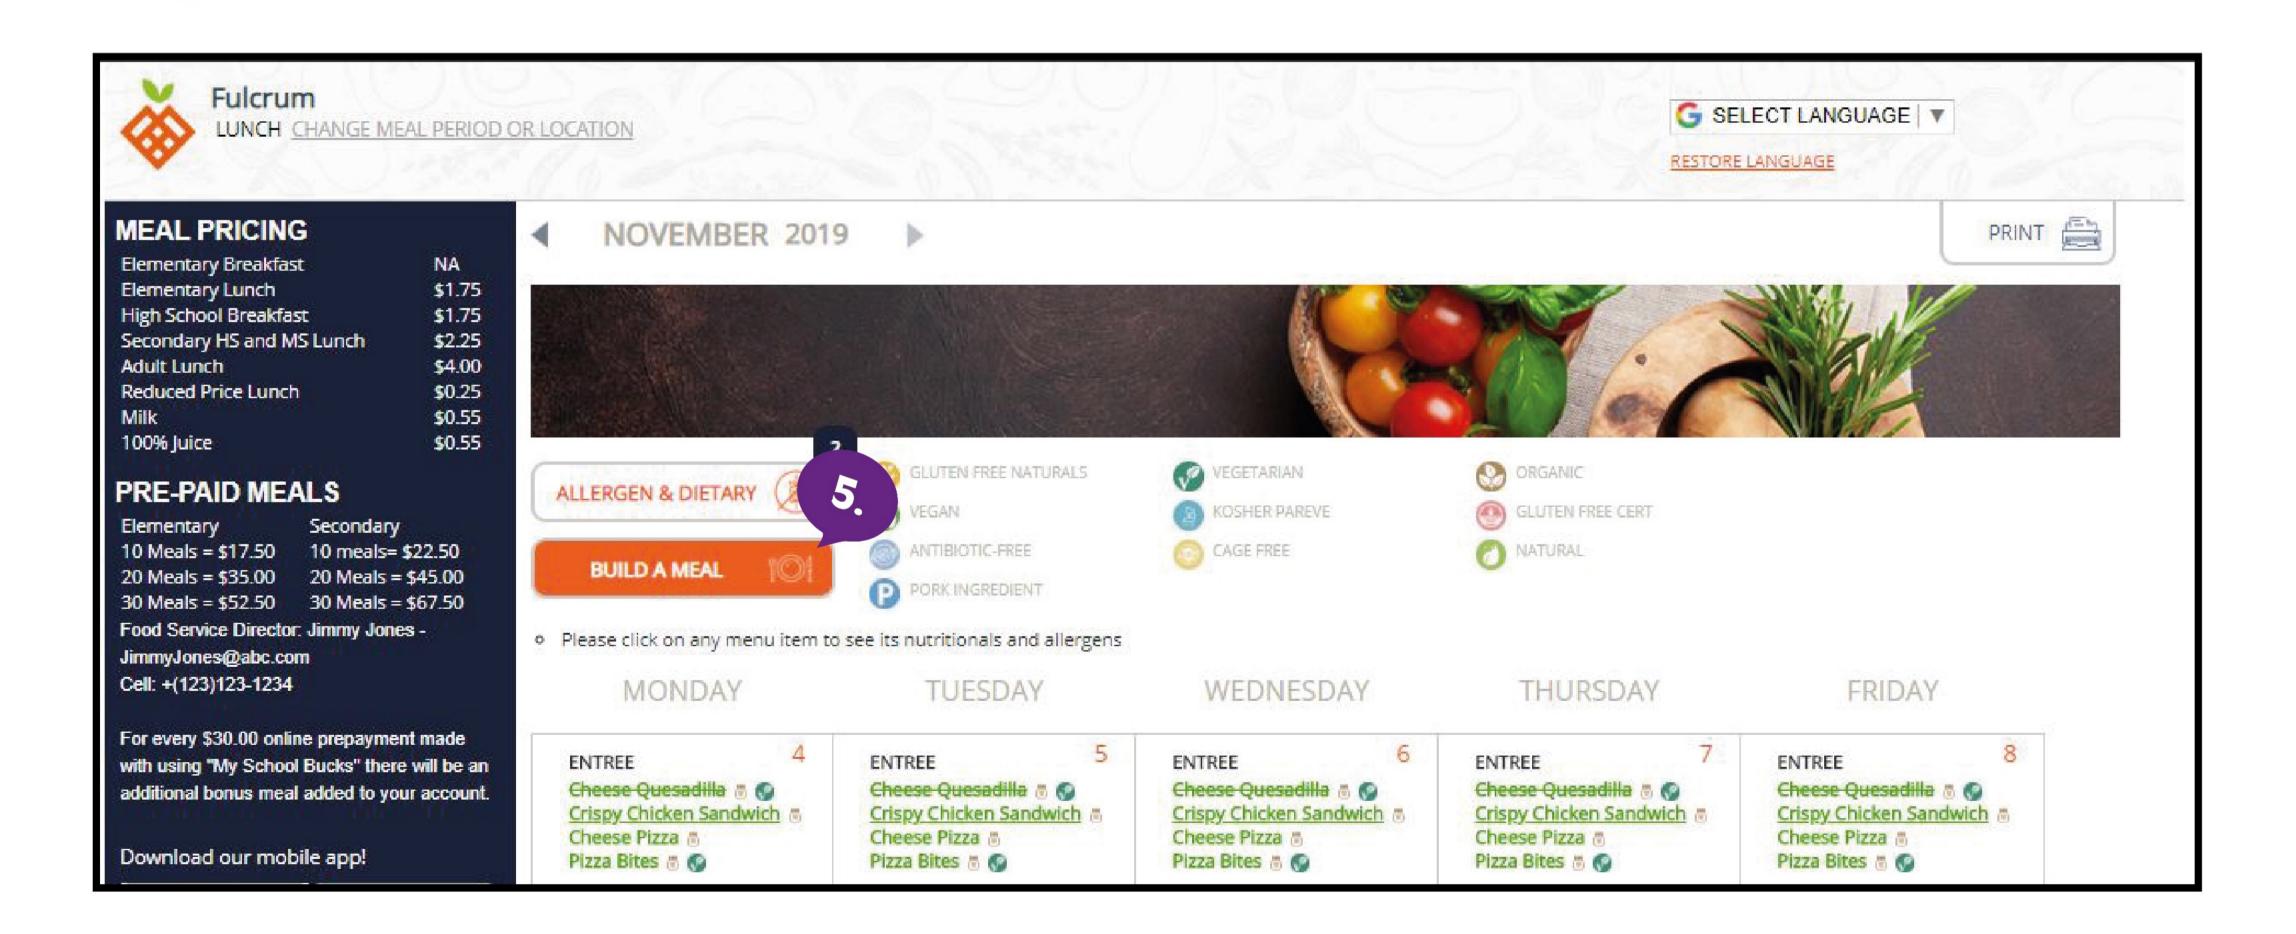

- The default language is English. However, you can select another language to translate the menu from the top right corner.
- To view nutritional or allergen information, simply click on any menu item. You can also rate the meal, leave comments or save the meal in your preferences (user login and password required for saving data.)

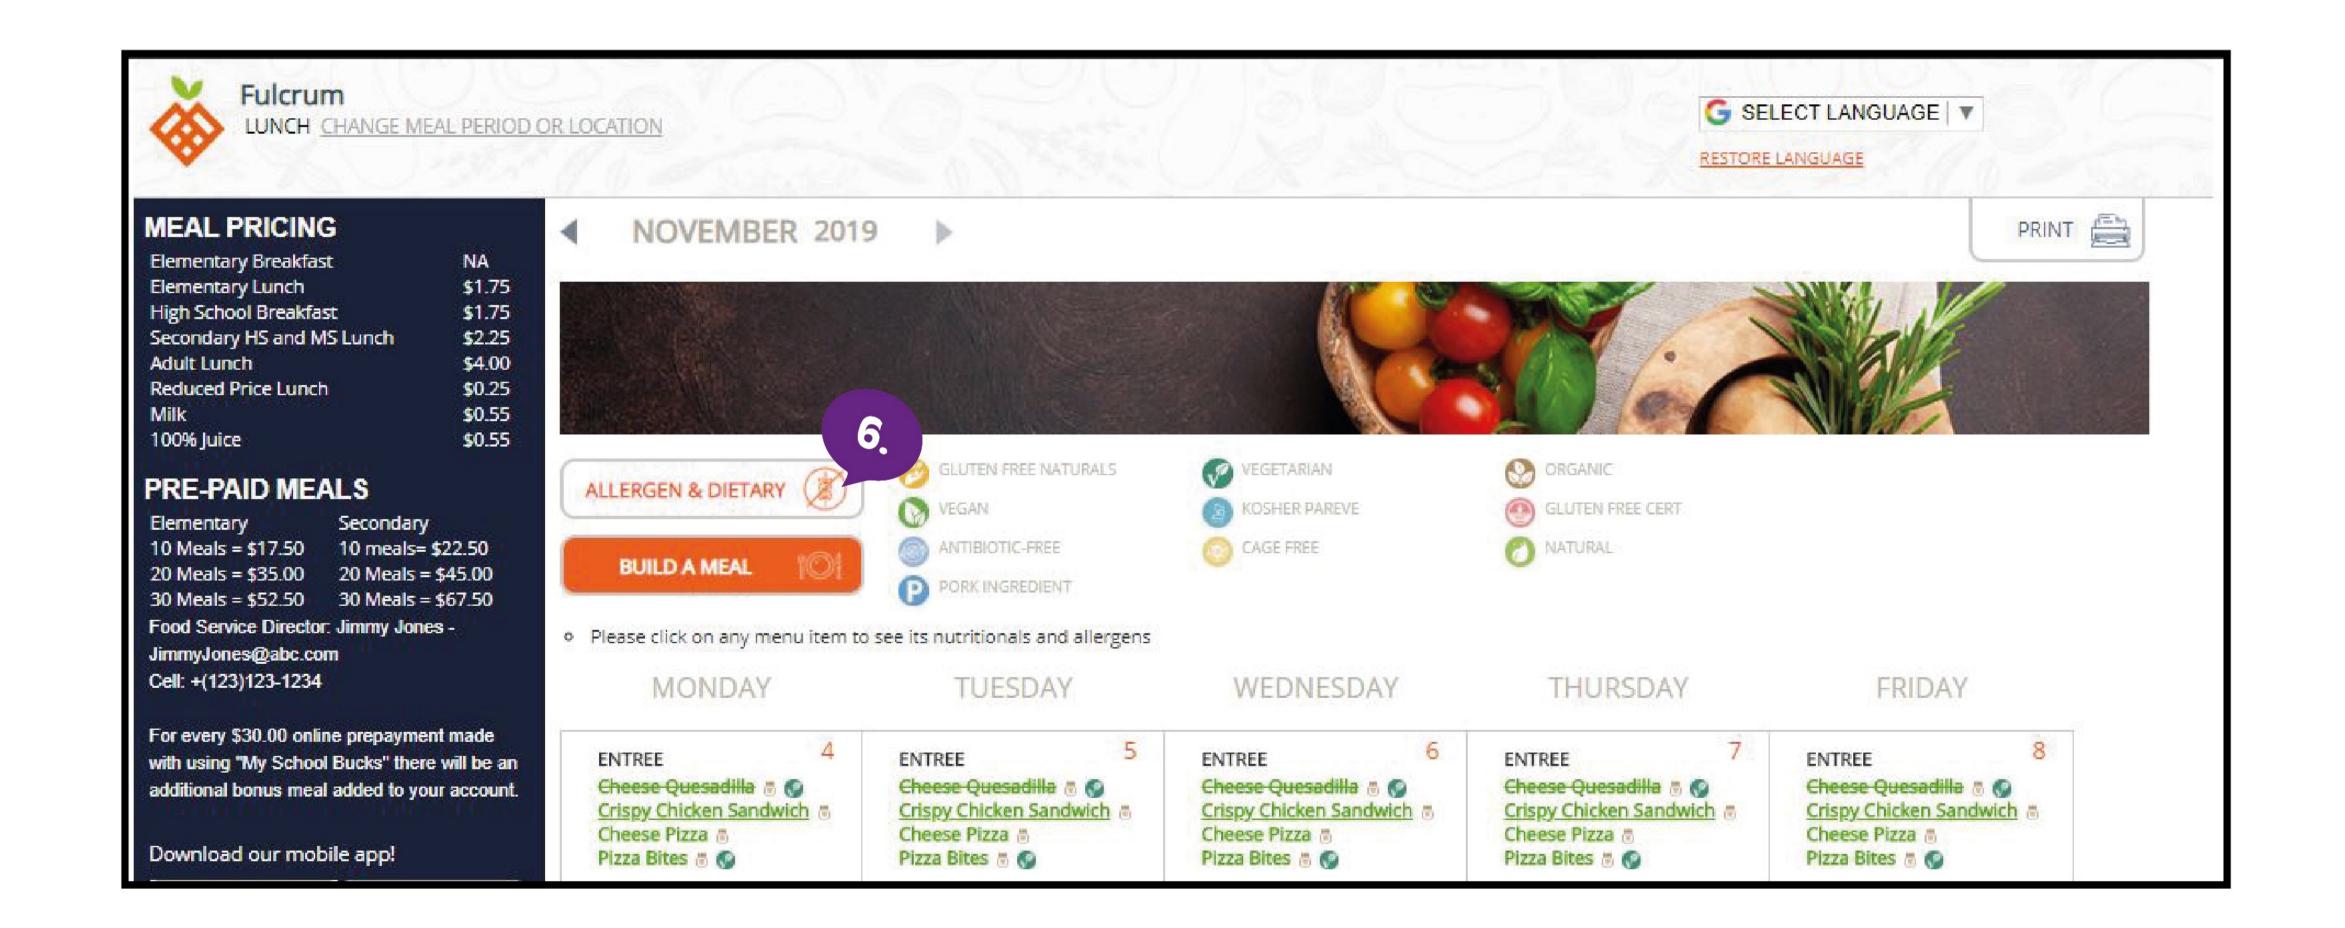

In addition to seeing one menu item, you can build a meal to see what an entire day's menu looks like. Click the orange BUILD A MEAL button on the upper left side of the menu. Select a day from the date box. When the menu items appear in the list format for the day selected, you can click the checkbox next to any menu item and the nutritional data and allergens will appear to the right. If you continue selecting multiple items that data will add up so you can see the total as a cumulative for the meal you have built. You can also click on the menu items directly to view the ingredient statement information.

6. To search for menu items that eliminate specific allergens or to use dietary preferences, use the allergen & dietary button. Items containing selected allergens will be struck through and ones with chosen dietary preferences will be highlighted. Once checked off, close the window using the X in the upper right corner.

The left side panel shows meal pricing, contact person, links to pre-paid options and other information and resources.

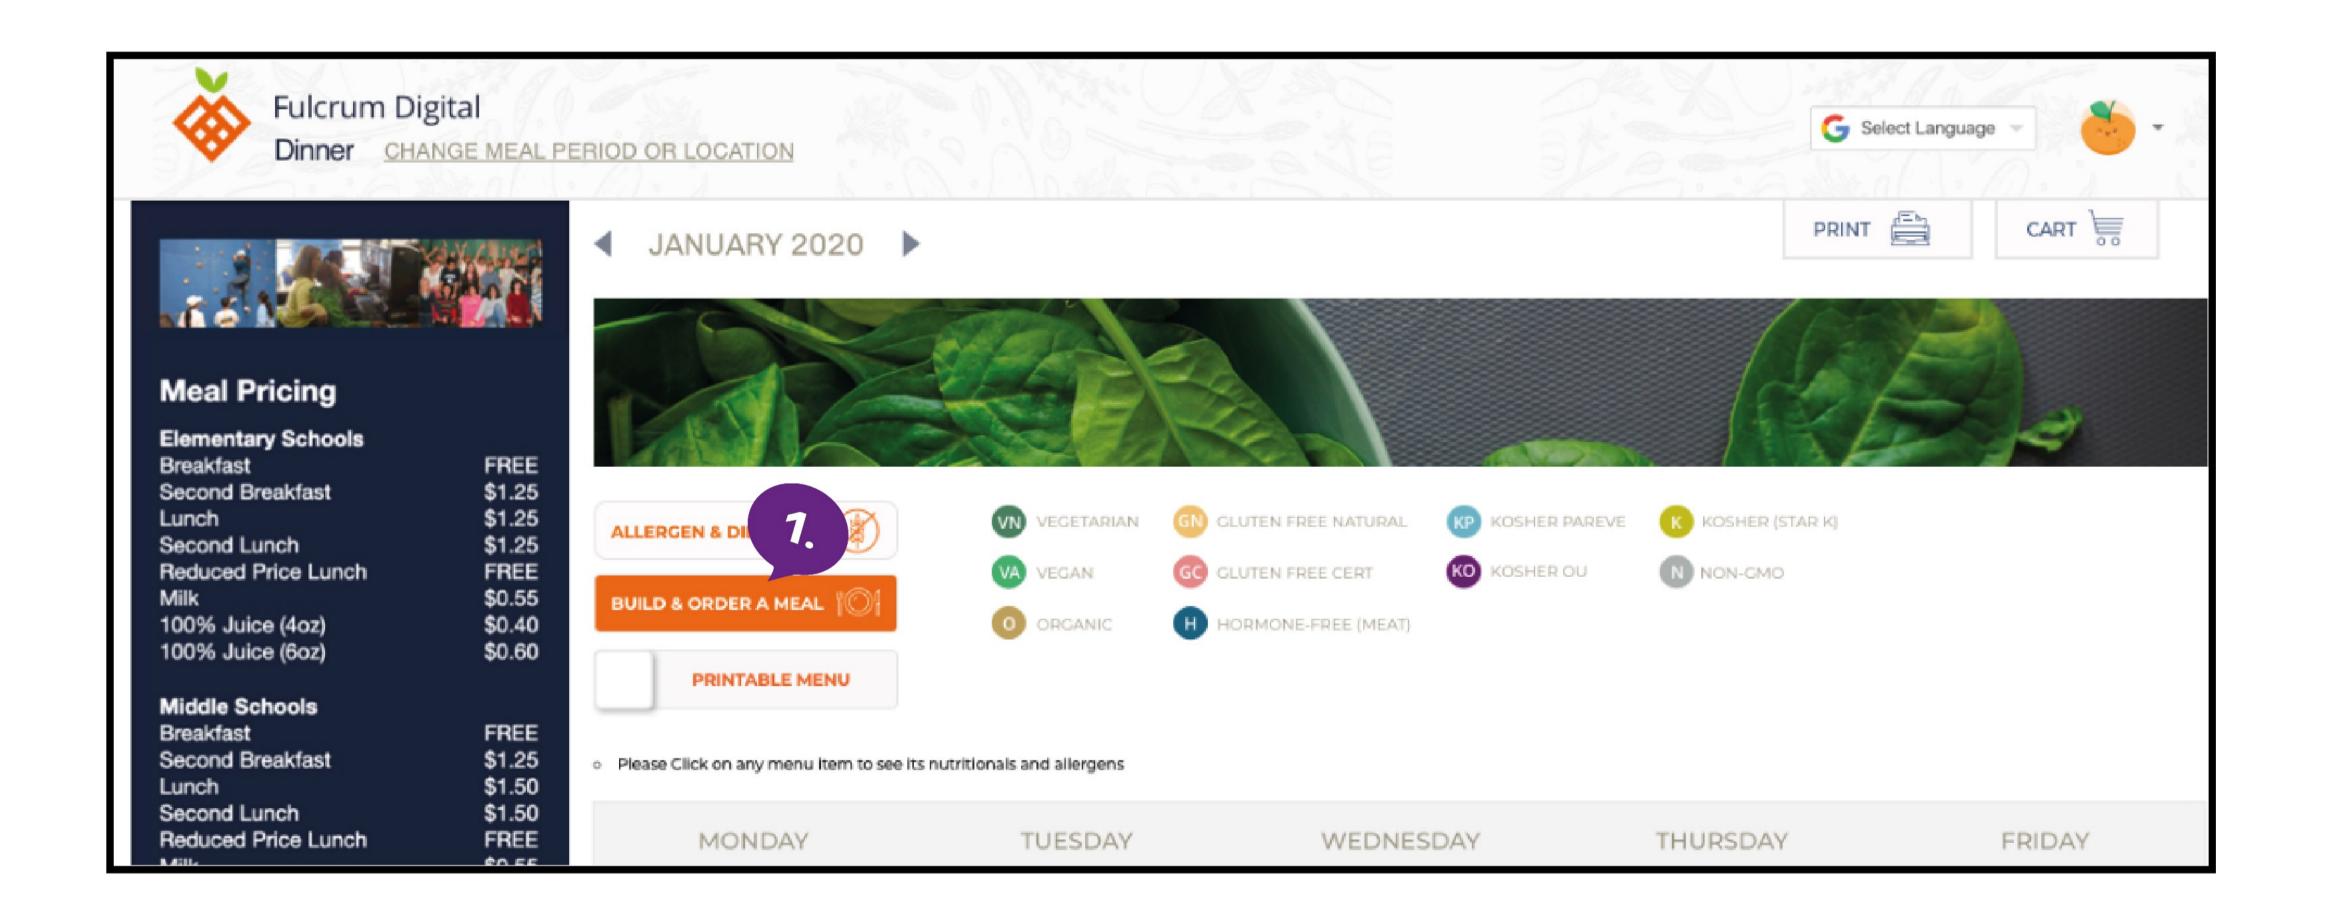

# Online Ordering

### Build & Order a Meal – Build Your Meal

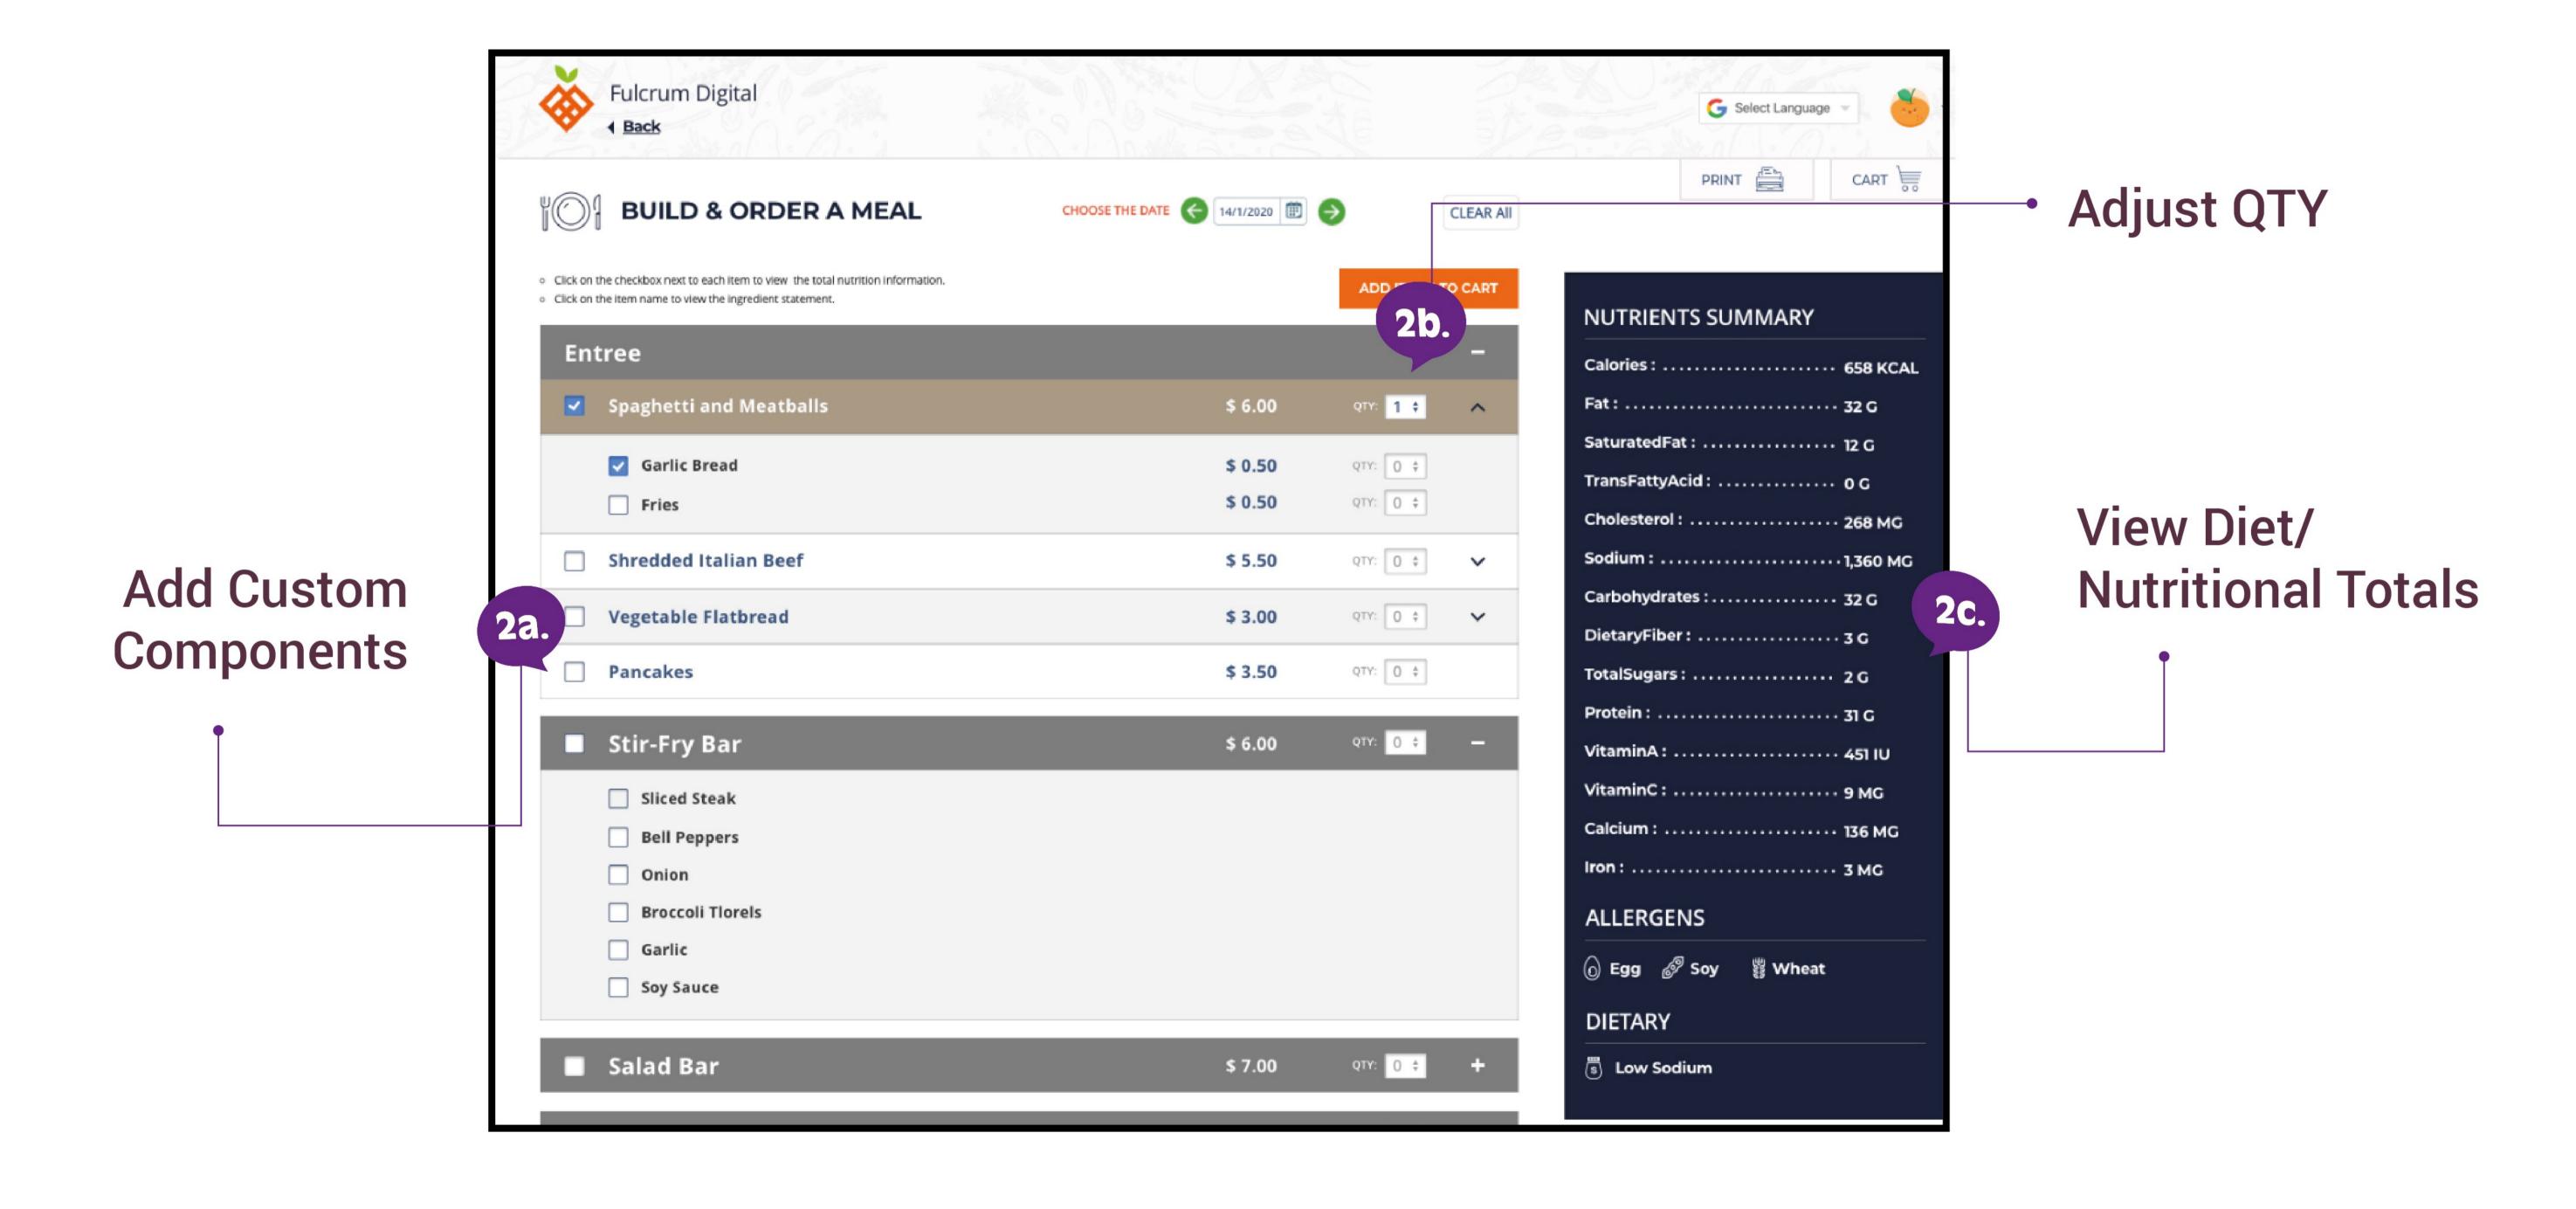

When available select the "Build & Order a Meal" button to begin the order customization and placement process.

## Build & Order a Meal – Build Your Meal

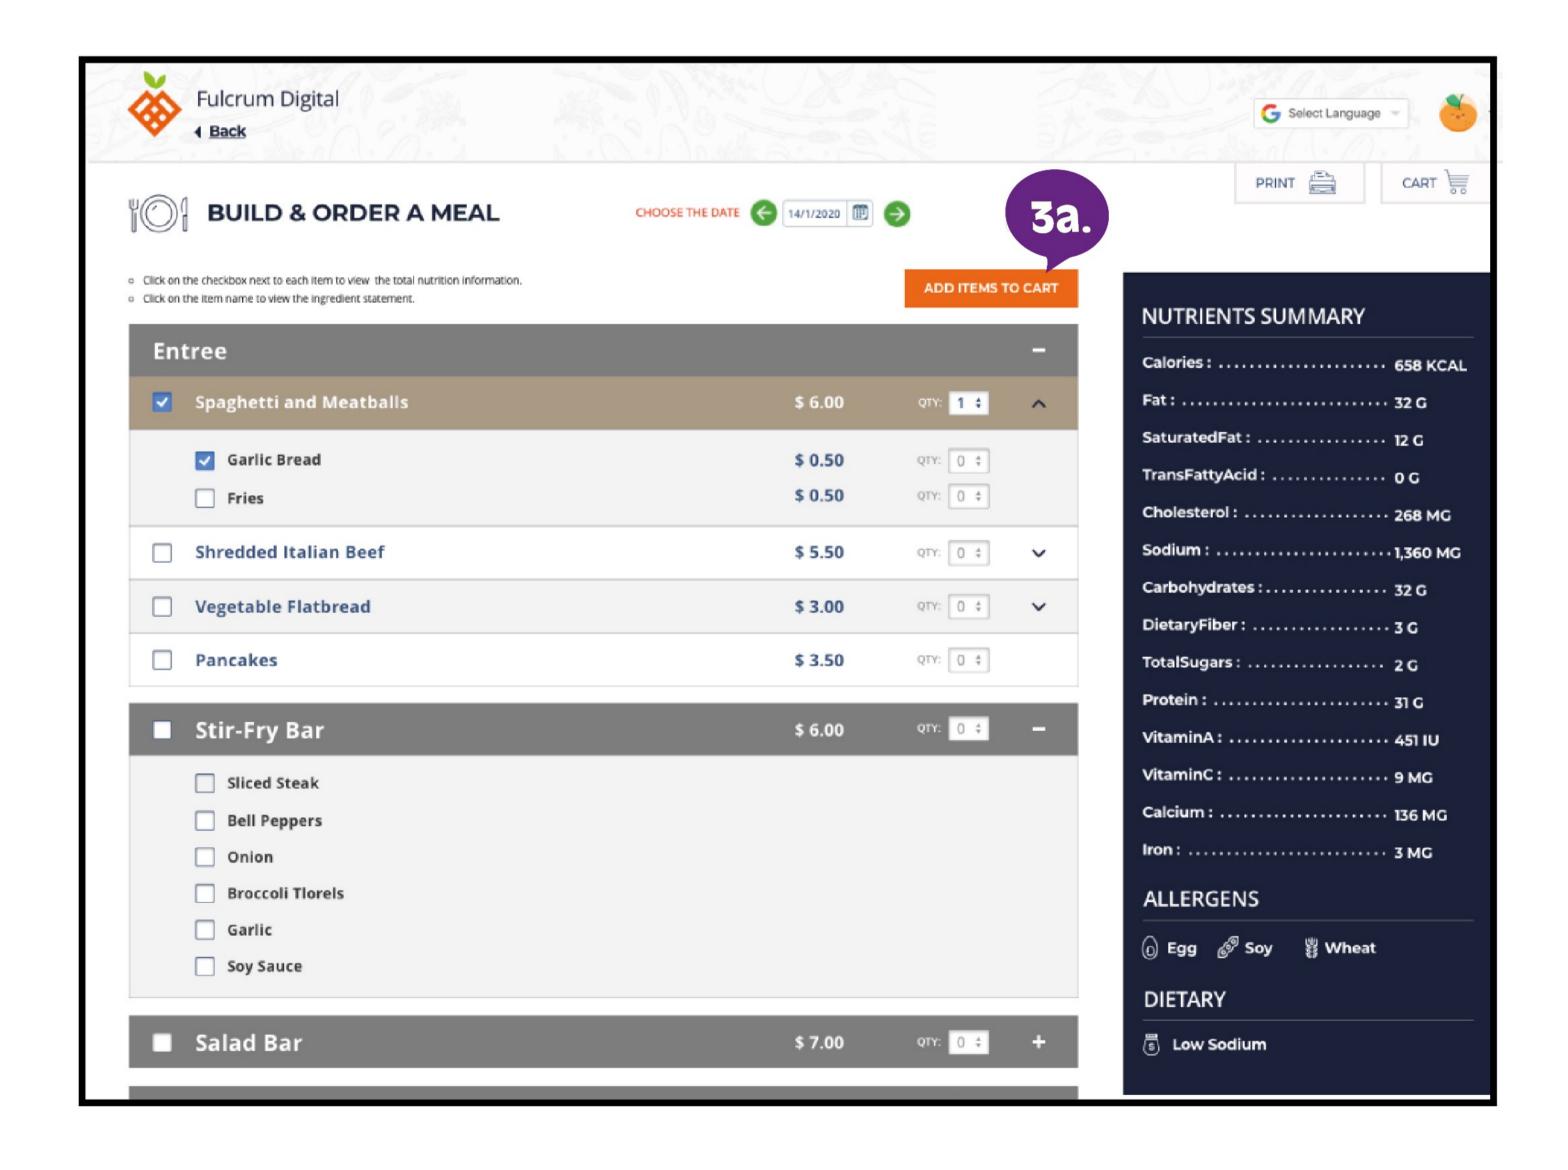

Once selected build a meal consisting of Food Bars, Entrees, Beverages, Condiments etc.

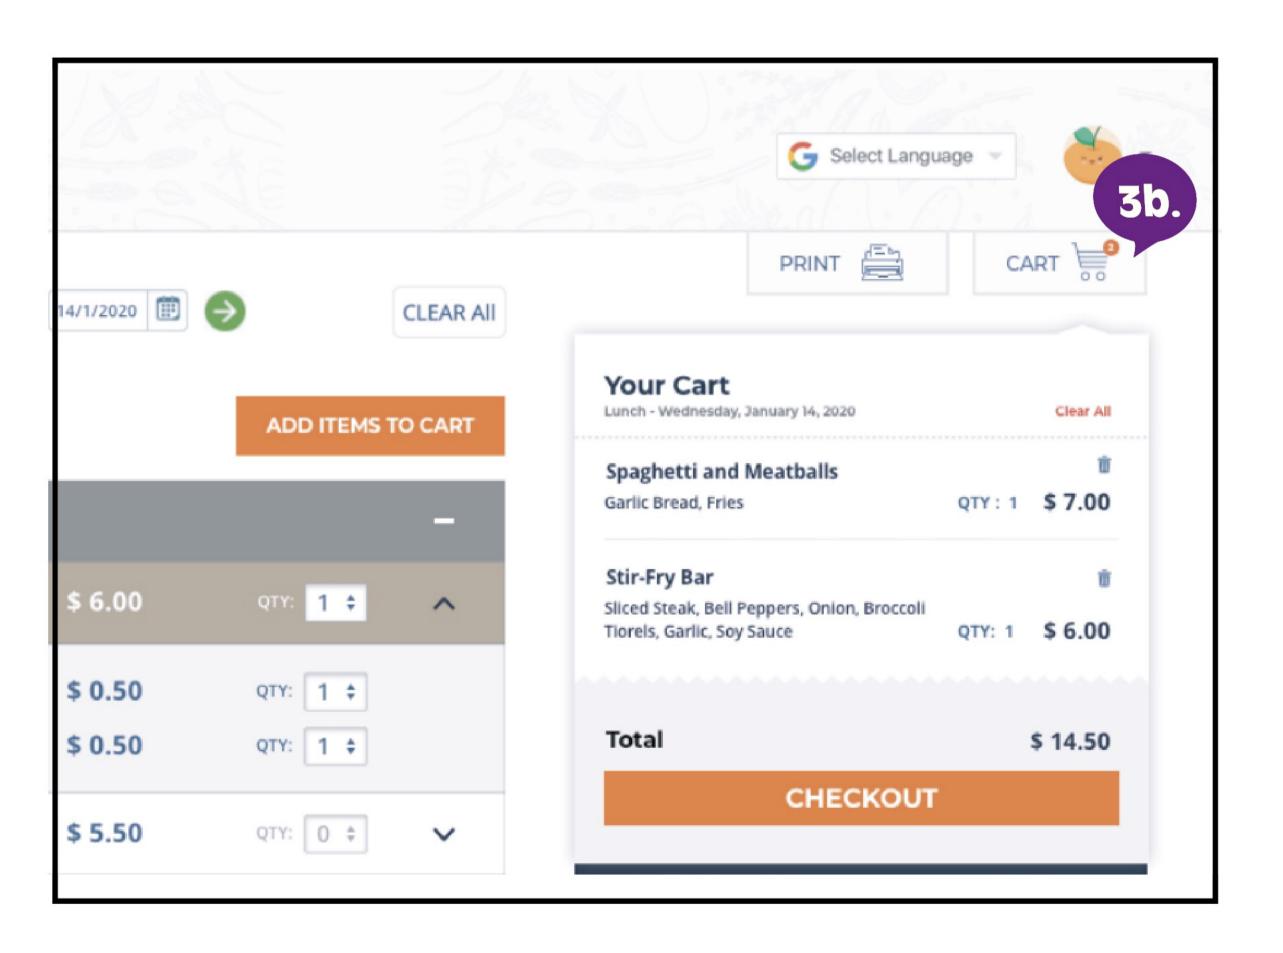

## **3** Build & Order a Meal – Checkout

Once your meal is built select "Add Items To Cart" to proceed. After Previewing the cart select Checkout.

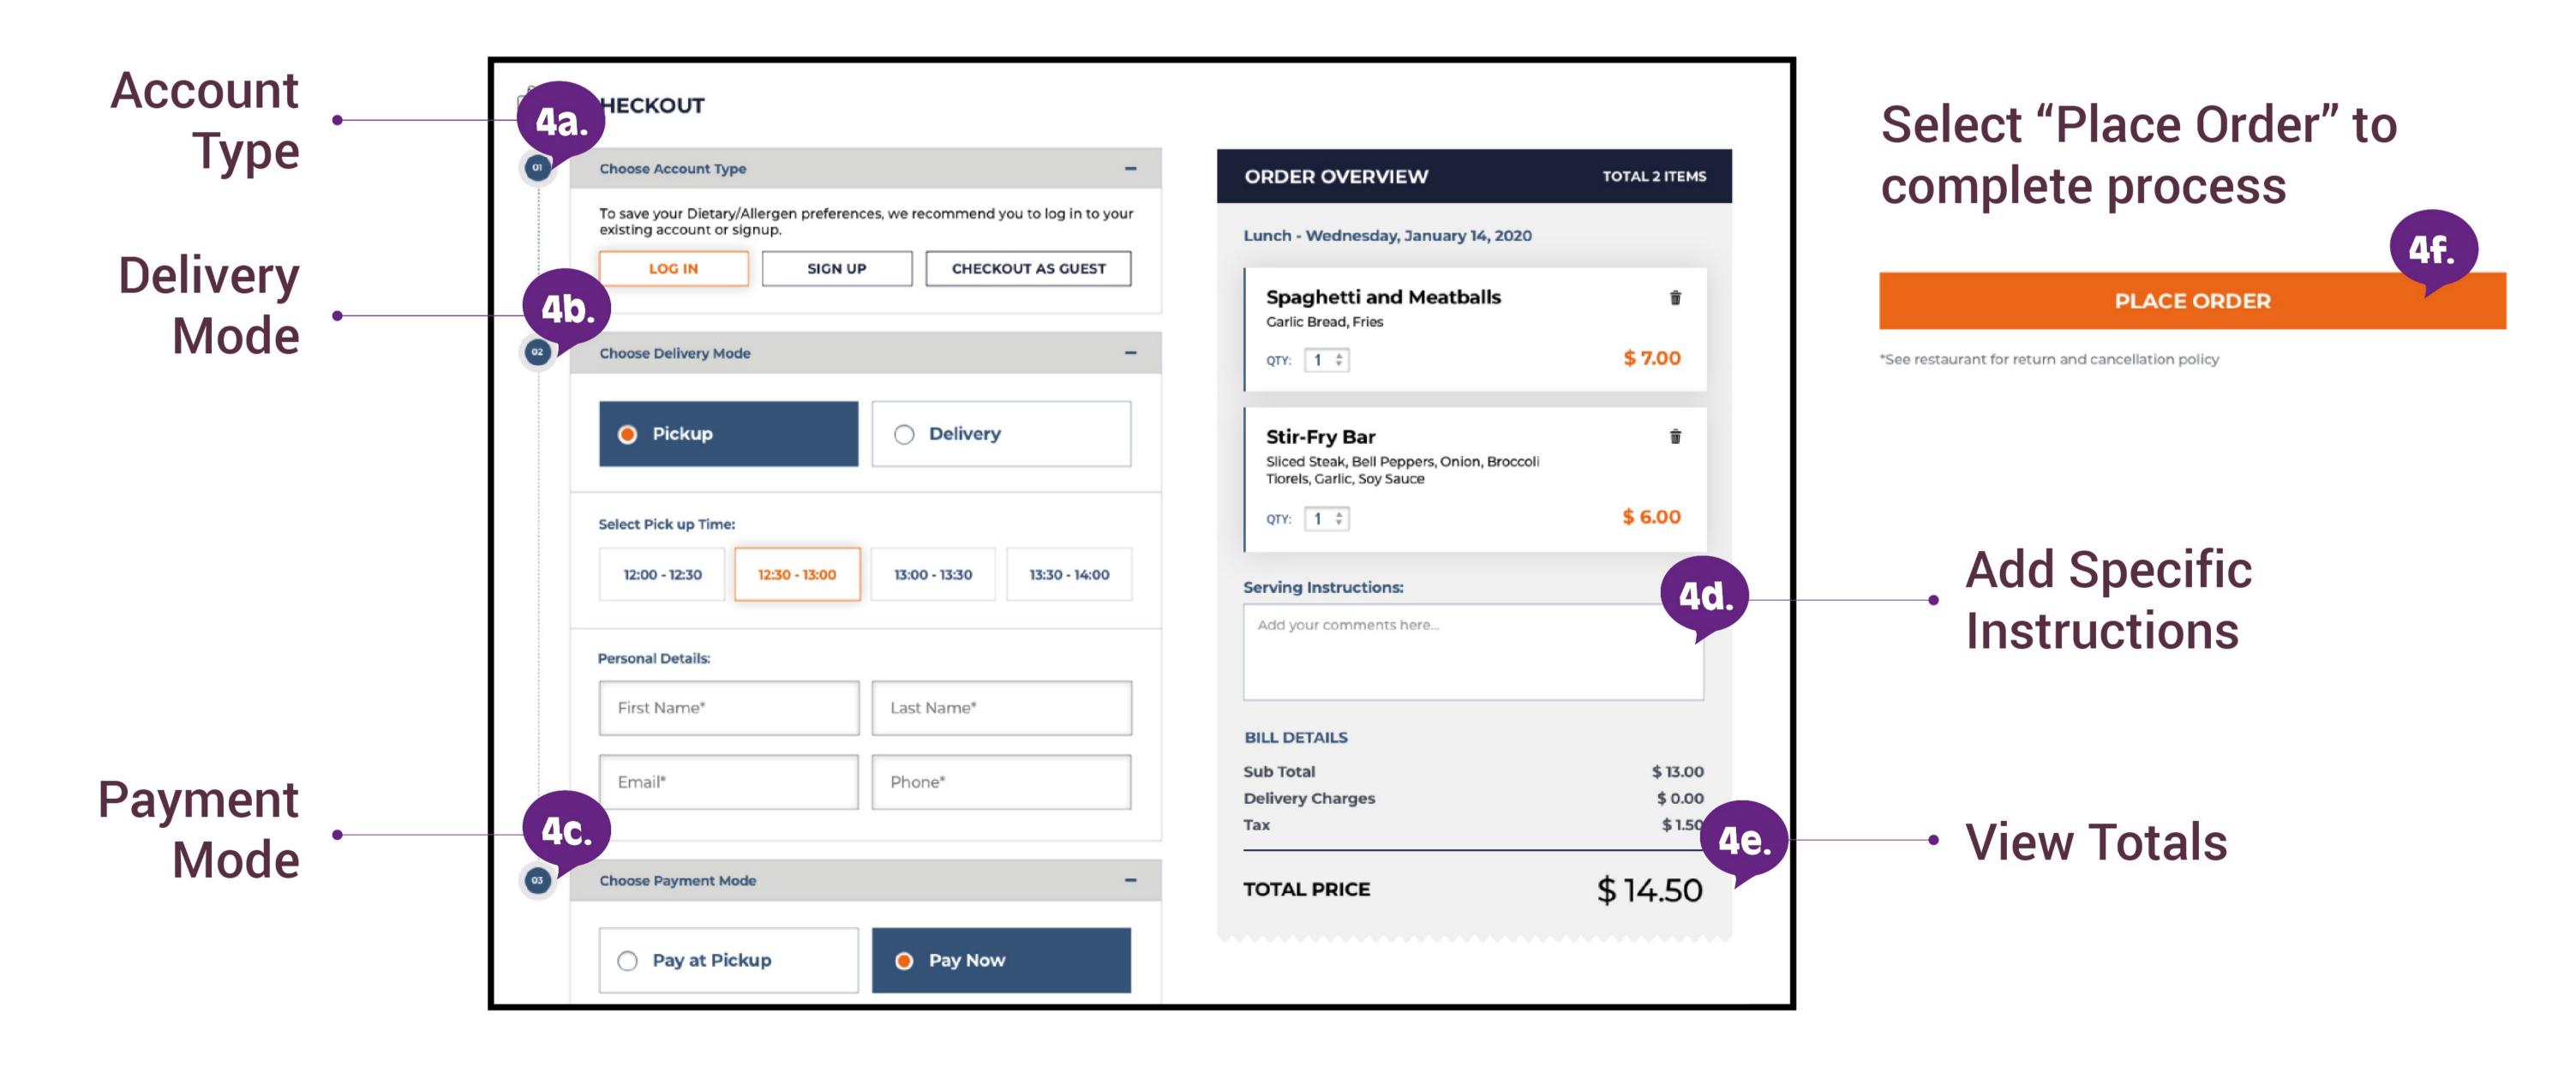

## Build & Order a Meal - Checkout

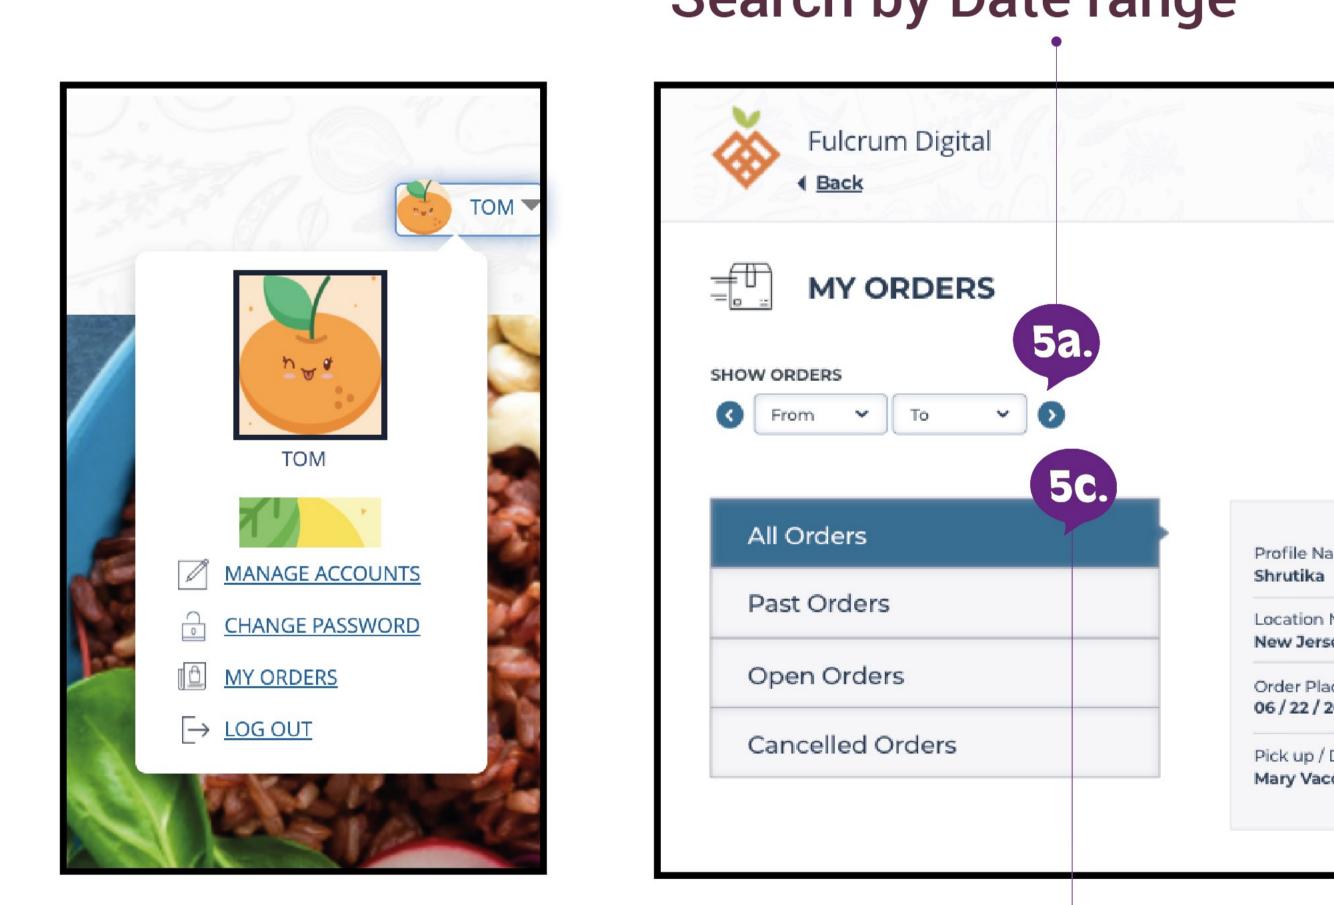

Via the checkout page follow the appropriate steps including selecting Account Type (Guest/Login), Delivery Mode (Pickup/Delivery), Payment Mode (Pay at Pickup/Pay Now). Ensure all mandatory fields are completed.

## My Orders

Click on 'My Orders' in the Profile dropdown to view My Orders page. Check the historical orders and Edit/Cancel any future orders. Click on EDIT button routes you back to the Cart/Order Overview section of the selected order. Here, you can delete items, or route back to 'Build A Meal' page to add new items. You can place your new edited order by click on 'Place Order' button.
